Amendments to the Specification:**Please add the following new paragraphs.****BACKGROUND OF THE INVENTION.****1. Field of the Invention**

This invention relates to a combined greetings card and reply post card, this invention relates to a greetings card that has three pages. In the case of the present invention the first two pages form a greeting card portion and the third page forms a reply post card.

2. Description of related art including information disclosed under 37 CFR 1.97 And 1.98

It is of course well known for other kinds of greetings cards to have three pages but in the case of the present invention the third page is not a decorative one. In the case of the present invention the third page is a detachable reply post card.

The reply post card portion of the combination is detachable, when detached it will leave the greeting card portion as a normal two-page greetings card.

The detachable reply post card would be in the form of a third page of the greetings card that is removable along suitable lines of weakness, for example perforations, however alternative means of detachment may be employed, it could also have no lines of weakness and in this case it would simply be cut off with scissors along a printed dotted line.

Please add the following new paragraphs.

BRIEF SUMMARY OF INVENTION

This invention is a combined greeting card and reply post card consisting of three pages, wherein two of the pages form a greeting card portion of the combination and the third page forms the reply post card portion of the combination.

There is a line of weakness between the greeting card portion and the reply post card portion enabling the greeting card portion to be separated from the reply post card portion.

The reply post card portion enables the recipient of the card to send his personal details back to the card publisher or any other organisation that produced such a card.

Amendments to the Specification:**Please add the following new paragraph****BRIEF DESCRIPTION OF SEVERAL VIEWS OF THE DRAWINGS**

Figure (1) is a view of the outside surface of the greetings card.

Figure (2) is a view of the inside surface of the greetings card.

In the figures similar features have been given the same reference numerals for ease of identification.

Referring first to Figure (1), there are the three pages of the greetings card 1,2 & 3.

Surface (1) is the outside of the front page of the greeting card, the usual decorative page.

Surface (2) is the out side of the back page of the greetings card, the page that usually has the information on e.g. Price Code, Card Company Name, Artist name.

Surface (3) is the outside of the detachable reply post card, in this instance with the card publishers details and a box to place a stamp in.

The card would be displayed as any normal two-page greeting card would be. Page (3) would be folded over onto Page (2) and then Page (1) would be folded on top of Page (3).

When folded the greetings card would appear as any normal two-page greetings card.

The Dotted Line (4) is a perforated line or alternatively it is simply a printed dotted line to be cut along with scissors.

Since the reply post card (3) is detachable, the bulk of the greeting card (1,2) could be retained for sentimental reasons.

The invention thus provides a combined greetings card and reply post card for the recipient to send his or her details back to the card company or any other organisation that published such a greetings card, the information received by the greetings card publishers could be used for any number of promotions.

(Continued from page 10)**Amendments to the Specification :****Please add the following new paragraph**

Referring now to Figure (2). Surface (1) is the inside of the front page of the greetings card. Surface (2) is the inside of the back page of the greetings card. Surface (2) comes with a greeting, in this instance "HAPPY BIRTHDAY". Surface (2) also comes with enough unused space for the sender to write a personal message.

Surface (3) is the detachable reply post card with spaces for the recipient to write in his or her own details, these details could then be used for any number of company promotions.
